

Web Application Development

CSS: Cascading Style Sheets

Charlie Garrod

School of Computer Science

Carnegie Mellon University

Things you should know

- Know how to write simple CSS rules (including nested selectors) for:
 - Generic HTML elements
 - HTML elements marked with the `class` attribute or `id` attribute
 - ...and when to use `class` and when to use `id`
- How to use `<div>` and `` to help define a document's style
